Security Researcher

Delhi, India • +91-9172204266 • aman.chourpagar@gmail.com • linkedin.com/in/aman-chourpagar

WORK EXPERIENCE

eSec Forte® Technologies , Gurgaon (On-Site)

07/2022 – Current

eSec Forte is a reputable cybersecurity company known for its expertise in penetration testing, vulnerability assessments, and comprehensive security solutions, helping businesses safeguard their digital assets with confidence.

Associate Information Security

- Red Team Exercises: Orchestrated simulated cyber attacks, mimicking real-world threats to uncover vulnerabilities in the organization's systems. Collaborated with the Blue Team to test the effectiveness of existing security measures, helping to identify and address weak points in the defensive strategy.
- Penetration Testing Leadership: Took the lead in conducting thorough penetration tests, utilizing advanced tools and methodologies. This proactive approach revealed critical security weaknesses, allowing the organization to address vulnerabilities before they could be exploited by malicious actors, thus bolstering the overall security posture.
- Vulnerability Assessment and Penetration Testing (VAPT): Conducted comprehensive assessments, identifying potential security risks across various layers of the infrastructure. Delivered detailed insights and actionable recommendations to the management, contributing significantly to the enhancement of the organization's security environment.
- Proactive Risk Mitigation: Maintained a vigilant stance by continuously monitoring and researching emerging cyber threats and attack vectors. Translated this knowledge into proactive measures, ensuring the organization was well-prepared to respond to evolving security challenges, ultimately minimizing potential risks and impact.
-

Synack Red Teamer , US (Freelance Remote)

07/2021

Synack is a cybersecurity company that offers crowdsourced penetration testing to help organizations identify and address vulnerabilities in their digital systems.

Red Teaming (Synack Red Teamer)

- Reported numerous critical vulnerabilities to clients to help secure their infrastructures.
- Assisted in verifying multiple patches for bug fixes.
- Contributed to missions to support some standard security tests requested by clients.

BreachLock Inc.NL(Remote)

02/2021 – 04/2022

Breachlock is a cybersecurity firm offering advanced penetration testing and vulnerability assessment services, combining automated scanning with expert manual testing for comprehensive security analysis

Security Research Analyst.

- Assisted as a product security engineer, helping them identify potential vulnerabilities in their web application APIs from a black-box perspective.
- Consulted their developer's team on how to write good fixes for vulnerabilities found and gave some insights about how to write secure code and always sanitize inputs.
- Helped integrate SAST and DAST into their CI/CD pipeline, working over AWS as a part of their DevSecOps.

EDUCATION

G H Raisoni, Nagpur, India (Dropped-Out)

Bachelor of Computer Application

SKILLS

Languages : Python 3, Python, JavaScript , Zsh, Bash, Java, Go.

Tools : Metasploit, NMap, GitHub, Burp Suite , Docker, Nessus, Postman, Impacket.

Security : Web Application Security , Cloud Security ,Red Teaming, API Security , Mobile security.

Paradigms : Penetration Testing, Red Teaming, Web Architecture.

Industry Knowledge: Red Teaming, Vulnerability Assessment, Penetration Testing, Network Security ,Cyber Defense , OWASP Top 10.

Certifications

OSCP (Offensive Security Certified Professional)

CEH (Certified Ethical Hacker)

CRISIL Limited Certified Expert Penetration Tester (CEPT)

FORTINET NSE1 and NSE2

Honor & Achievements

Hall Of Fame & Rewards : I have ethically hacked and reported vulnerabilities to many companies and helped them secure there infrastructure by reporting multiple vulnerabilities through there Bug Bounty Program / VDP

Other Experience

- **Large-Scale Subdomain Enumeration Project:** Led efficient subdomain enumeration using a custom script. Monitored vulnerabilities with Nuclei, ensuring ongoing subdomain security.
